

David A. Norfleet is a Certified Cost Consultant (CCC) and a Certified Forensic Claims Consultant (CFCC) with the Association for the Advancement of Cost Engineering (AACE International) where he is currently President for the Rocky Mountain Section. He holds a Bachelor of Science degree in Business Management and has been qualified as an expert witness in construction claims and disputes cases. To advance the practice of cost engineering and further his own development, he currently serves on the AACE International Decision and Risk Management Certification Task Force assisting in the development of a new professional certification. Prior to that, he also served on AACE International's CFCC Certification Task Force and participated in the development of that certification, allowing him to be among the first certificate holders.

David's experience covers all aspects of a project, but focuses primarily on cost and risk issues such as estimating, economic analysis, forecasting, and cost control. This expertise expands into change order management, contracts, and claims issues. He has excellent knowledge of construction practices and government contracting regulations. His government contracting experience includes the Federal Acquisition Regulations (FAR), Defense Contracting Audit Agency (DCAA) guidelines, and Cost Accounting Standards (CAS). During his career David has worked across many major industries including aerospace, telecommunications, nuclear waste, manufacturing, energy, facilities management, insurance, and construction. David is a regular speaker and author on cost engineering topics of interest to various industry groups.
